

Dear Kansas Legislators:

We are your constituents and neighbors, and we are outraged by the continuing suffering of Kansans who are needlessly sick and dying because we have not provided them with safe access to the medicine they need.

We ask that you protect the right of patients and doctors to treat illnesses in the manner they believe works best, including the use of medicinal marijuana, by providing Kansans with Compassionate Care Legislation.

Modern medical research has discovered beneficial uses for marijuana in treating or alleviating the pain and other symptoms associated with certain debilitating medical conditions. Kansans deserve a new law that allows physicians to prescribe marijuana for relief from symptoms associated with such diseases as Multiple Sclerosis, cancer, AIDS, Crohn's Disease, and other serious illnesses.

We ask that Kansas provide Compassionate Care Legislation to protect from arrest, prosecution, property forfeiture, and criminal and other penalties those Kansans who might use marijuana under their physician's supervision in order to alleviate suffering.

It is clear that science and the public support medical marijuana legislation. Other states have legally recognized marijuana's potential for the safe and effective treatment of medical illnesses. The Federal Government has now adopted a posture deferring to the states' own enacted legislation approving medical cannabis use. Kansas voters deserve to be included among those who have been granted compassionate access to cannabis for relief of pain and disease. Circulated by: Susan Hughes, 427 Simpson Rd. El Dorado, Kansas 67042 316-322-7285
